## 1 4" Flush Valve

The flush starts with a piston action flush valve that lifts straight up, allowing water to pour into a 4" valve opening from all directions. 1.6 gallons of water enters the bowl in less than a second - three times faster than standard 2" flush valves, and twice as fast as even performance 3" flush valves. The flush is quiet, too - no noisier than a traditional toilet (this is not a loud, pressure assisted flush valve).

## 2 360 Degree Cleaning

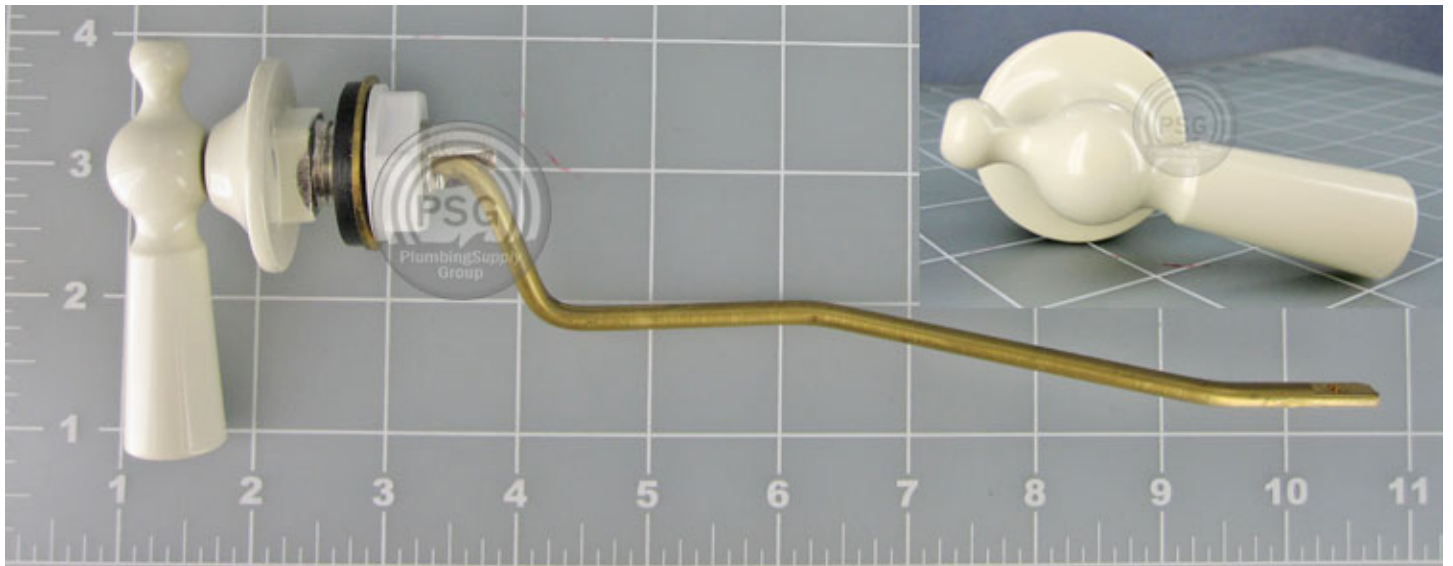

Water entering the bowl does so in a sweeping 360-degree motion. This is designed to help completely clear the bowl, even while using less water.

## 3 Powerful Siphoning Water Jet

A perfectly positioned water jet captures the circular flow of water for optimal performance with minimal energy loss (water doesn't hit a flat spot and slow down). As waste and water exit, they are siphoned into the trapway for an unmatched push/pull one, two punch.

## 4 2-3/8" Fully Glazed Trapway

Waste and water exit the toilet through a trapway that is fully glazed, which seals it and provides for a smooth surface that waste can in no way cling to. The industry-leading 2-3/8" diameter chute also allows for solids with a nearly 70% greater mass to exit without clogging.

American Standard H2Option Siphonic Round Two-Piece Toilet American Standard's H2Option siphonic dual-flush round-front toilet available in white, bone, and linen.

Save up to 35% on the American Standard 2002.014 from Build.com. Low Prices + Fast & Free Shipping on Most Orders. Find reviews, expert advice, manuals & specs for.
